HONGKONG, THURRDAY, APRIL 29, 1880. lamentably defenceless condition laid might complain, we should have to submit. Much has recently been said and written, officially and unofficially, concerning this important subject; and great deal has been made of a possible Celestial Corps. But a ready and valuable means of defence is in hands, and the Government has failed to make the best use of it in it power. We allude to the Volunteers. As is well known the Colony must look for no additional European force to that at present stationed here. The Artillery force is miserably deficient, and for fighting guns the Lascars may be written efficient gunners could be raised as ing present Volunteers, These with the Regulars could manage well at the guns with which the forts are likely to be armed. That our calculation is about correct. Yangtaze Inc. Assoc., Th. 735, per share is manifest, when at the revival of the Artillery Corps under the present panied Inspector Mathleson and staff of the Chinese Ins. Co., \$295, per share, sales. governorship, it mustered one hundred Water Police to the Kowloong Docks, and H. K. Fire ins Co. \$830, pershare, sales. and forty strong. To-day it is a bare sixty. The reason for this rapid falling off must be sought for outside the boat over to the charge of the Water spathy which is too frequently ascribed Police. His Excellency the Governor to our gallant citizens. What is really having expressed a wish to take a trip to required is official encouragement. The the new boat, the Police were taking the Government clothe them at a rate of Charles May to Mucray Pier to meet His China Sugar Refining Co., \$159, per shares: about five dellars per head per cuntum.

Their Orderly Room is rendered useless for Goods per Oceanic undelivered after this the lumber of the Surveyor General. The regulation allowance of small-arm ammunition is even denied them. Their rapidy fading number, therefore, is not to be wondered at; the marvel is that they exist at all. But we do not think so badly of the youth and muscle of the men of Hongkong, as to suppose that, if properly fostered, they would hesitate joining, even at some selfsacrifice, in what is really a public duty. Given then, the raw material, how must it be worked up. First and foremost, a smart officer of the Regular Army is necessary for Commandant. The inspections must be periodically made. The grant of money must be doubled. and proper guns for drill placed at their disposal. As a further inducement three drills a month should exempt a man from the Jury list. If it is adduced that the state of the Jury list would render this onerous on the non-volunteers, we can but say we are glad if it be so; let the idlers do their work. Taking his place naturally amongst the Men of Talk, as opposed to those of action, H. E. the Governor has thought fit to refuse this suggestion—a suggestion which if carried out would, we believe, have long ere this filled. up the skeleton ranks of the Corps. After all, Hongkong is not Ireland, and the reasons which induced Her Majesty's Government from allowing Volunteer Corps to be formed from amongst His-Excellency's late constituents cannot be urged here. The Governor, certainly, as regards the maintenance of the interests of the Foreign residents of this Colony, has displayed that "masterly inactivity" so highly prized in certain official circles, and we congratulate him 3 p.m. - Occidental & Oriental S. S. Co.'s Are the foreigners in Hongkong slive to the urgency of the case, that Volunteers are even more necessary here than in England, that neglect of every means of defence at their disposal is but courting disgrace and spoliation? If so, we must take the law in our own hands. The animus or the incapacity, whichever it may be, of the present Head of the Executive with regard to the Volunteer question is too well known. But while representing the Queen and ruling over us, he is at the same time the servant of the public; and if he does not see fit to encourage and carry into effect the laudable aspirations of those whose interests he is here to foster, we have but one thing to do, and that is to petition the Home Authorities to insist upon their due performance.

Vulgar current opinion on a medical question is not of much value. but the statement as to the prevalence of humatemesis in China comes from cultivated Chinamen, who are not only repeating a rumour, but giving the results of their own observations. Their view is, that this gastric homorrhage is to be attributed to the habit of a large number of their countrymen of eating largely at wide intervals, and distending the stomech with fluids, so producing hyperæmio erosion of its walls and eruptions of vessels; and also to the effects of tea-drinking on the nutrition kong to inquire into the working of the of the walls of the vessels in persons who are living poorly and obtaining very insufficient supplies of fresh meat and vegetables. Intimations.

TIHE widely-expressed regret at the dis-China and Japan, has induced the publishers of this journal to issue a publication similar in object and style, but slightly modified in certain details.

THE CHIMA REVIEW, or Notes and Queries on the Far East, is issued at intervals of two months, each number containing about 60 octavo pages, occasionally illustrated with lithographs, photographs, woodcuts, &c., should the papers published demand, and the circulation justify, such extra matter.

The subscription is fixed at \$6.50 postage paid, per annum, payable by non-residents in Hongkong half-yearly in advance.

The publication includes papers original and selected upon the Arts and Sciences,

Ethnology, Folklore, Geography, History, Literature, Mythology, Manners and Customs, Natural History, Religion, &c., &c., of China, Japan, Mongolia, Tibet, the Eastern Archipelego and the "Far East" generally. A more detailed list of subjects upon which contributions are especially invited is incorporated with each number. Original contributions in Chinese, Latin, French, German, Spanish, Italian or Por-tuguese, are admissible. Endeavours

are made to present a resume in each number of the contents of the most recent works bearing on Chinese matters. Great attention is also paid to the Review department, Notes and Replies are classified toge-

ther as "Notes" (head references being given, when furnished, to previous Notes or Queries), as are also those queries which though asking for information, furnish new or unpublished details concerning the matter in hand. It is desirable to make the Queries proper as brief and as much to the point as possible.

The China Review for July and August, 1875, is at hand. It says that forty-two essays were sent in to compete for the best paper on the advantages of Christianity for the development of a State. All our learned societies should subscribe to this scholarly and enterprising Review. It is a sixty paged, bi-monthly, repertory of what scholars are ascertaining about China. The lecture on Chinese Poetry in this volume is alone worth the price of the Review. Ad-

dress China Review, Hongkong. - Northern Christian Advocate (U.S.) Trubner's Oriental Record contains the following notice of the China Review :- "This is the title of a publication, the first number BOMBAY, MAHE, ST. In my8 a paper on Dr. Legge's She King, by the Rev. E. J. Eitel, to which the place of honour is deservedly given, an excellent summary is presented of the chronological problems and arguments involved in connexion with this important work. Some translations from Chinese novels and plays are marked by both accuracy and freshness of style; and an account of the career of the Chinese poet-statesman of the eleventh century, Su Tung-p'o, by Mr. E. C. Bowra, is not only historically valuable, but is also distinguished by its literary grace. Beside notices of new books relating to China and the East, which will be a useful feature of the Review, if carried out with punctuality and detail, we are glad to notice that "Notes" and "Queriea" are destined to

degree of literary zeal to that which was

THE CHINESE MAIL. This paper is now lasted every day. The subscription is fixed at Four Dollars per annum delivered in Hongkong, or Seven Dollars Fifty Cents including postage to Coast ports.

It is the first Chinese Newspaper ever issued under purely native direction. The chief support of the paper is of course derived from the native community; amongst whom also are to be found the guarantors and securities necessary to place it on a business and legal footing.

The projectors, basing their estimates upon the most reliable information from the various Ports in China and Japan, -from Australia, California, Singapore, Penang, Saigon, and other places frequented by the Chinese, consider themselves ustified in guaranteeing an ultimate circulation of between 3,000 and 4,000 copies. The advantages offered to advertisers are therefore unusually great, and the foreign community generally will find it to their interest to avail themselves of
